

The grassroots organizing app that lets you meet people where they are.  
Built by organizers, for organizers.

### Action Feed

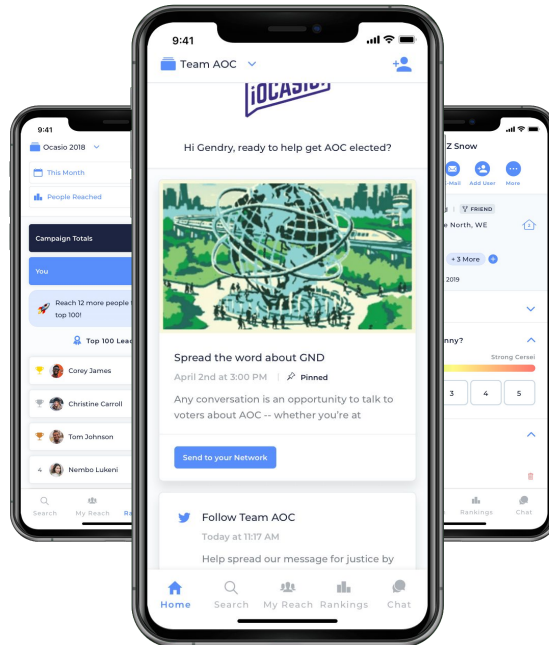

The Reach Home Screen is your campaign's digital HQ where customizable Action Cards guide your users through Calls to Action both within Reach and elsewhere, allowing them to earn Action Points.

### Live Search & Survey

Identify and activate anyone you meet or know by searching for them directly in your voter file and collecting data. Add new people who aren't in the voter file on the fly!

### Leaderboard

Compete with other volunteers to rise to the top of the rankings. Keep your eyes on the prize! Motivate users and give them a snapshot of how the campaign is going.

### Team Chat

Full-featured chat right in the app and on the web. Organizing, team-building, and communication is now in the same place as voter contact.

### Contact Import and Matching

Users import and match their phone or Google contacts to your data for easy, accurate, and relevant relational organizing.

### Reach out & Follow-up

Use template-based custom Contact Scripts to email or text your contacts, message them with any app on your phone or make phone calls. Even add voters as users for immediate peer-to-peer onboarding.

### Organize Everywhere

Volunteer energy is off the charts, but other organizing tools don't let you fully leverage that power to its potential. Reduce back-office overhead and empower organizers with an always-ready, intuitive, and flexible canvassing experience and customized push notifications.

### Integrated

Get your data out of reach whenever and however you want. Export CSVs on demand, schedule automated exports, use our webhooks, build off our API, and integrate with VAN/EveryAction to send data from to Reach to VAN in real time! Even get Reach notifications in Slack.

### Build Community

Too many tech tools make your volunteers feel isolated like cogs in a wheel. From profile pics, to Team Chat, to live Rankings, once your users are in Reach, they'll know they're in the right place and a part of the team.

### Designed to be simple

Every cycle, we all spend way too much time struggling with badly-designed tech. At Reach, we we prioritize design and user experience for volunteers and admins to minimize training time and give you a tool that is actually fun and easy to use on your phone or on the web.

### Grassroots-Friendly

- We're priced with the grassroots in mind.
- Unlimited users and responses for all campaigns.
- Pricing options based on database size or the size of your organization.
- Multiple plans at each pricing tier to fit your budget.
- Month-by-month contracts
- Optional add-ons like white-labeling.

### Progressive

Our clients are all people-powered and within the movement. No corporate money here!
